ABSTRACT

The present invention relates to a method for the cosmetic
treatment of a keratin material comprising at least the steps
of: (a) having available a lyophilizate containing at least one
live or inactivated, physiologically acceptable microorgan-
ism, one of its metabolites or one of its fractions and at least
one surfactant with an HLB greater than or equal to 12, (b)
having available a physiologically acceptable medium, sepa-
rate from the said lyophilizate, (c) bringing the said
lyophilizate extemporaneously into contact with the said
